A. Yakhot, T. Anor, H. Liu & N. Nikitin	Direct numerical simulation of turbulent flow around a wall-mounted cube: spatio-temporal evolution of large-scale vortices	1
A. Guégan, P. J. Schmid & P. Huerre	Optimal energy growth and optimal control in swept Hiemenz flow	11
J. W. Shan & P. E. Dimotakis	Reynolds-number effects and anisotropy in transverse-jet mixing	47
R. Mukund, P. R. Viswanath, R. Narasimha, A. Prabhu & J. D. Crouch	Relaminarization in highly favourable pressure gradients on a convex surface	97
D. Yu & S. S. Girimaji	Direct numerical simulations of homogeneous turbulence subject to periodic shear	117
C. D. Dimitropoulos, Y. Dubief, E. S. G. Shaqfeh & P. Moin	Direct numerical simulation of polymer-induced drag reduction in turbulent boundary layer flow of inhomogeneous polymer solutions	153
G. J. Sharpe & N. Maflahi	Homogeneous explosion and shock initiation for a three-step chain-branching reaction model	163
M. Ren, C. C. M. Rindt & A. A. van Steenhoven	Three-dimensional transition of a water flow around a heated cylinder at $Re = 85$ and $Ri = 1.0$	195
L. Krishnan & N. D. Sandham	Effect of Mach number on the structure of turbulent spots	225
Y. Chen, M. M. Weislogel & C. L. Nardin	Capillary-driven flows along rounded interior corners	235
S. Ayyalasomayajula & Z. Warhaft	Nonlinear interactions in strained axisymmetric high-Reynolds-number turbulence	273
H. Dong, R. Mittal & F. M. Najjar	Wake topology and hydrodynamic performance of low-aspect-ratio flapping foils	309
V. Mitchell & A. W. Woods	Self-similar dynamics of liquid injected into partially saturated aquifers	345
O. Flores & J. Jiménez	Effect of wall-boundary disturbances on turbulent channel flows	357
J. Tao	Nonlinear global instability in buoyancy-driven boundary-layer flows	377
J. Zhang, D. Vola & I. A. Frigaard	Yield stress effects on Rayleigh–Bénard convection	389
A. M. Gañán-Calvo, J. M. López-Herrera & P. Riesco-Chueca	The combination of electrospray and flow focusing	421
P. Huang, J. S. Guasto & K. S. Breuer	Direct measurement of slip velocities using three-dimensional total internal reflection velocimetry	447
C. Pozrikidis	Motion of a spherical particle in film flow	465
